CTSnet LT is an advanced PC software application that allows users to remotely monitor, control and configure Sentinel instruments.*

APPLICATIONS

- Automotive
- Powertrain
- Consumer Goods
- Energy
- HVAC/R
- Medical
- Consumer Electronics
- Other Transportation

**Description**

CTSnet LT is an advanced PC software application that allows users to remotely monitor, control and configure Sentinel instruments.*

**Highlights**

- Manage networked instruments
- Simple instrument set-up and test configuration
- Control and monitor testing sequence
- Easy exporting of reports
- Update firmware remotely
- Copy program utility
- Waveform visualization
- Included at no cost with Sentinel I28, Sentinel MH and Blackbelt instruments
- Available in English, German and Chinese
Monitor/Control
- Connect to a single instrument at a time
- Automatic instrument discovery
- Start/stop tests in real time
- View I/O with assignments in real time
- View local history of results/counters and stats
- Zoom/pan waveform data
- Calibrate programs

Configure
- Edit all programs
- Perform transducer calcs and verifications
- Perform electronic regulator calibrations
- Zoom/pan waveform data
- Calibrate programs

Export/Utilities
- Export results/config/calibrations
- View cal/verification reports
- Easy copy program interface
- Backup and restore instruments settings and all programs
- Remotely update firmware
- User log to view all changes made
- Informative help interface

System Requirements
